How the Trader Support Service will work

One off registration

- ➤ Trader registers on TSS digital platform and provides required information

Data Submission

- ➤ The carrier submits shipment information to TSS. Information needed includes:
  - Transport ID
  - XI or EU EORI
  - Consignee, consignor, importer and exporter details
  - Transport document certificates
  - Mode of transport
  - Arrival/departure port
  - Weight, goods description, packaging description and count of individual packages within each declaration item
  - Shipping marks to identify items)
- ➤ TSS provides the carrier with an Entry Summary Declaration (ENS)

Frontier Declaration

- ➤ TSS processes a simplified frontier declaration (based on initial registration and ENS) on behalf of the trader

Transportation

- ➤ HMRC provides approval to move goods from GB to NI

Declaration Completion

- ➤ Trader provides additional shipment information to complete the frontier declaration. Information needed includes:
  - Country of origin, destination and dispatch
  - 10 digit import commodity code
  - Preference (e.g. whether preferential duty applies)
  - Valuation method and any supporting evidence e.g. commercial invoice document
  - Authorisation, licence or other document details as required

Evidence and Duty

- ➤ Trader maintains evidence and pays duties or claims subsidy on goods "at risk"
